

WORLD FLY FISHING DAY

Giornata Mondiale della Pesca a Mosca

June 21st 2021

“There is no greater sport to honor.” Joan Wulff

The Italian Fly Fishing School (SIM) and the Game Angling Instructors Association (GAIA) would like to thank you for joining our initiative to contribute celebrating and promoting fly fishing around the world on the day of the summer solstice (June 21) of each year.

This day is symbolically associated with change, a new beginning and resumption of all activities. Despite the distance due to this pandemic emergency, the World Fly Fishing Day will be an opportunity to get together, have fun and reflect.

At this stage, each fishing association and organization, as well as each fly fishermen who have joined the initiative, will have to organize events and meetings to disseminate and spread fly fishing in their own town/country: any activity from a simple gazebo in the square to professional booths in fairs of any kind is more than welcomed, just bear in mind that the focus would be to show casting, fly tying and hold entomology classes to raise awareness on the importance of aquatic insects which are the waters natural purifiers.

We would encourage you all to share with us your ideas and projects regarding promotional events organized on your territory in order to spread it through all channels.

Moreover we also invite you to join the Facebook group of the initiative where you can post any content (audio, video, photo) about the world of fly fishing and promote all the events organized on the occasion of the World Fly Fishing Day. For registration the link is the following: <https://www.facebook.com/groups/1114146169012882>.

In order to better organize your initiatives, we look forward to receiving your feedback.

Best regards.

“Flyfishing knows no border, the cast of the fly is universal.” Jack Dennis
